敬愛的錢教授：

裘槎基金會
「2024/2025 中國內地來訪學者計劃」

自 貴校與本校簽訂學術合作協議書後，雙方都積極探索各方面合作機會，以進一步加深相互之聯繫，共同為促進教育發展而努力。

為了加強中港兩地學者交流，在香港成立的裘槎基金會設立了一個名為「中國內地來訪學者計劃」，鼓勵中國香港專上學院邀請中國內地一些傑出的科研者來港，在各院校參與為期六個月的科研活動。本校現誠邀 貴校推薦合適的年青科研者，參與是項計劃。有關計劃詳情可參考附件。

該計劃支持的研究範疇包括自然科學、科技、地理或環保科學。參加者須在 45 歲以下，有志進行科研交流，並能安排在港逗留六個月進行有關學術活動。到訪學者亦會被邀在本校進行演講、主持研討會、參與研究計劃等等。裘槎基金會贊助共港幣十四萬四千元，以資助每一位學者來訪期間的基本食宿費用及來回機票。

貴校如欲推薦合適的科研人員參與是項計劃，請於二零二四年三月一日前將有關學者的履歷、聯絡方法及交流計劃初稿郵寄（致香港新界大埔露屏路 10 號香港教育大學 D4 座 1 樓 21 室研究與發展事務處）或傳真致本處（傳真號碼：(852) 2948 7697），以便本校有關部門能儘快甄選合適的學者，然後聯絡初步入選學者，共同確定有關交流計劃，提交裘槎基金會審批。請注意，現時只是雙方聯絡推選人及草擬交流計劃的階段，任何來訪學者的名單及交流計劃的詳情須待裘槎基金會批准才得以落實。如有任何查詢，請聯絡葉家瑜女士（電話：(852) 2948 6675 或 電郵：yipky@eduhk.hk）或陳咨瑜女士（電話：(852) 2948 8246 或 電郵：jasminechan@eduhk.hk）

感謝 貴校與本校共同促進學術交流之努力，恭候佳音。

敬祝

工作愉快

Croucher Chinese Visitorships

Overview

If you are a scientist under the age of 45 in the mainland of China, wishing to do an academic attachment in Hong Kong, this may be for you.

The attachment is for six months and may be for training, collaborative research and giving lectures and workshops to staff and students in the recipient institution.

The fields covered by this scheme are Natural Science, Technology or Medicine. Subjects such as physical geography or environmental sciences which are may fall outside the faculties of science, engineering or medicine in some institutions, are also considered.

Applications should be made via eligible institutions in Hong Kong who then submit their nominations to Croucher Foundation.

For more details see the [Notes for applicants](#).

Notes for applicants

Overview

These Visitorships are to enable scientists under 45 years of age in the mainland of China to come to Hong Kong to do academic attachments in one of the institutions in Hong Kong. The attachment may be for training, collaborative research and giving lectures and workshops to staff and students in the recipient institution.

All Croucher Chinese Visitors, as these awardees are called, must be ready to spend six months on this attachment in Hong Kong. It is hoped that apart from scientific exchanges, the Visitors may also have the opportunity to understand the different aspects of life in Hong Kong with reasonable exposure to the community.

Each visitorship is in the form of a grant made by Croucher Foundation to the recipient institution which may at its discretion decide on the form of distribution of the grant to the Visitor. While each grant carries stipend to subsidise the Visitor's living expenses in Hong Kong, it is NOT a salary and it is inconsistent with the terms of such grants if an institution uses it to employ staff.

Procedurally, the Foundation does not take direct applications, and only accepts nominations from tertiary institutions in Hong Kong where these visitorships are tenable.

General Procedure

These Visitorships are at present tenable only in the following institutions in Hong Kong: Hong Kong Metropolitan University, Lingnan University, and The Education University of Hong Kong.

The Foundation informs each institution, around January every year, of the number of visitorships that will be available in that institution in the coming academic year. Each will be invited to submit nominations for the Foundation's consideration.

Nominations are accompanied with the curriculum vitae of each of the candidate.

The nominator must spell out the intended programme of activities for the nominated candidate, and to confirm that the relevant department/unit is responsible for taking care of the Visitor during the attachment.

In the event of concurrent nominations of the same candidate by two or more universities in one exercise, the Foundation reserves the right to designate the host institution. For these reasons, universities are not entitled to confirm an offer of a visitorship to its candidates until the Foundation formally approves in writing the nominations.

Nominated visitors should be informed by the nominating institutions that they are supported by the Croucher Foundation when they receive invitations from the universities.

Invitation letters by the institutions to visitors should be copied to the Foundation for record. The Foundation appreciates to be informed about the dates when the nominated visitor actually arrives and stays in Hong Kong, to enable the Foundation to establish contact if appropriate.

The relevant administrative office in each institution will make annual reports to the Foundation at the end of each academic year about the visits during that year, and if for some reason a balance remains by the end of the year the Foundation expects to be accordingly advised about the disposal of the remainder.

Criteria for the Selection of the Croucher Visitor

The selected visitor should be younger scientist and are willing to stay for six months to spare some time to understand the way of life in Hong Kong. Those who prefer to stay for less must obtain agreement from the Foundation, and under this scheme it does not wish to support any individual who plans to stay for less than three months.

The areas of specialization of visitors are confined to Natural Science, Technology and Medicine, but the Scheme may also cover such subjects like physical geography and environmental sciences which are sometimes organised outside the faculties of science, engineering or medicine in some institutions. Unless circumstances are exceptional, Trustees do not favour candidates above 45 years of age.

An individual who is on a Croucher Visitorship scheme to any institution in Hong Kong within three years of the current nomination will not be acceptable.

Upon completion of the Visitorship, a Croucher Visitor is expected to return to serve the academic community on Mainland China and not stay on immediately in Hong Kong or move on to another country for employment.

Croucher Chinese Visitorships were first introduced in 1992 and by 2021 this very popular scheme attracted 426 young and outstanding scientists to take six-month attachments in universities in Hong Kong.
